## PRODUCT DATA SHEET

# BEJ-On-A-Reel

*Silicone-coated, precompressed, primary seal for rapid installation into small joints*

### Product Description

**BEJS-On-A-Reel** from Sika Emseal is a cost-effective version of Emseal's industry-standard BEJS (Bridge Expansion Joint System) product shipped on a reel for rapid installation into small joints — 1/2 to 1 1/4-inches wide (12 – 30mm). It is supplied precompressed smaller than the joint gap.

**BEJS-On-A-Reel** is designed to replace traditional liquid sealant/backer rod combinations which rely on the difficult to achieve "hour glass" shape. In addition BEJS-On-A-Reel can be installed at temperatures other than mean temperature and will function properly fully throughout the thermal cycle. It can also be used in place of backer rod in asphaltic plug configurations to provide a secondary watertight seal.

### Features

- Pre-cured silicone primary seal
- Cost effective
- Shipped on 12-foot reels
- Easy to stock
- Smooth convex surface
- Rapid installation — new or retrofit
- Watertight
- Conforms to substrate irregularities
- Easily handles changes in plane and direction
- Traffic durable
- Easy to repair
- 100% free of wax compounds

### Standard Sizes

- Width: 1/2", 3/4", 1" and 1 1/4" (12, 20, 25 and 30mm)
- Depth of Seal: 1 3/4" (45mm)

### Movement Capability

Total 120% (+60% and -60%) of nominal supplied size

### Composition

BEJS-On-A-Reel (BOR) combines a factory-applied and cured silicone bellows with a microsphere-modified acrylic-impregnated expanding foam sealant backing.

BOR features Emseal's patented microsphere-modified acrylic impregnation infused into a cellular foam base material and is coated with a high-grade silicone coating that has been tested for durability under UV, water, and air pressure differential exposures typically experienced by modern structures.

### Performance Limitations

Substrates must be clean, parallel, plumb and capable of resisting approx. 2.5 psi backpressure from the foam.

### Sizing Chart

Product Code*	Nominal Material Size (Joint Size @ Mean)	Min. Joint (closes to)	Max. Joint (opens to)	Depth of Seal
BOR - 0050	1/2" (12mm)	1/4" (6mm)	3/4" (20mm)	1 3/4" (45mm)
BOR - 0075	3/4" (20mm)	5/16" (8mm)	1 1/4" (30mm)	1 3/4" (45mm)
BOR - 0100	1" (25mm)	3/8" (10mm)	1 1/2" (40mm)	1 3/4" (45mm)
BOR - 0125	1 1/4" (30mm)	1/2" (12mm)	2" (50mm)	1 3/4" (45mm)

## BEJS-On-A-Reel

Factory-applied and cured, tensionless, silicone weather facing

## Installation

- *NOTE: This is a summary installation sequence for illustration purposes only. See BEJS-On-A-Reel Install Data for complete instructions.*
- Clean the joint faces
- Using the silicone sealant provided, gun a continuous installation bead of sealant 3/8" (10mm) back from the joint edges on each substrate.
- Unroll BEJS-On-A-Reel and remove release liner.
- Insert BOR into the joint pushing on the material so that it 'snakes' from side to side.
- Overcut each length by 3/8" (10mm). BOR will self-expand to fill the joint. The combination of the active backpressure, embedment into the silicone installation bead, and the pressure-sensitive nature of the acrylic impregnation ensures the attachment of the foam to the substrates.
